

Fun Facts

Coffee beans can help eliminate bad breath.

- Coffee bean extracts can help prevent the buildup of bacteria, according to a new study by researchers from Tel Aviv University in Israel.
- The fact that coffee causes bad breath when combined with milk has long been known because of the fermentation of odor-causing substances in the mouth. In light of this, the solution lies not in the coffee itself but in how it is consumed. The compound of the coffee bean to use as an ingredient and its extraction for mouthwash is currently the subject of research.
