

Did you know?

Corn is a **vegetable**, **fruit**, and **grain**.

NEXT →

Corn is a combination of all three.

- In terms of botany, maize is a fruit. It is created from the maize plant's blossom or ovary.
- Corn is specifically classified as a caryopsis, and caryopses are frequently referred to as grains. The variety and time of harvest determine what corn is.
- These sweet corn kernels are classified as a starchy vegetable when they are harvested from young, immature corn ears of the sweet corn variety.
- Popcorn is a corn variety harvested at the mature state when kernels become hard and dry, and is classified as a grain.
