

ONE GATE POLICY

CONTROL IS BETTER THAN CONVENIENCE

Secure your perimeter by managing entry through a single controlled access point.

WHAT IS A ONE GATE POLICY?

A One Gate Policy means all people, vehicles, and materials enter and exit through one designated gate.

- ✓ Better monitoring
- ✓ Improved security
- ✓ Controlled movement

WHY MULTIPLE GATES INCREASE RISK

Every additional gate creates:

- More blind spots
- Higher monitoring costs
- Greater chances of unauthorized access
- Difficult visitor tracking

BENEFITS OF A SINGLE CONTROLLED GATE

- Stronger access control
- Easier surveillance
- Accurate visitor records
- Better vehicle management
- Faster security response

IDEAL FOR HIGH-SECURITY SITES

A One Gate Policy is highly effective for:

- Industrial Facilities
- Manufacturing Plants
- Warehouses
- Data Centers
- Construction Sites
- Logistics Hubs
