

ORGANIC COFFEE

Organic coffee

Organic coffee refers to coffee beans that have been grown and produced without the use of synthetic fertilizers, pesticides, or genetically modified organisms (GMOs).

- Coffee organic farming practices prioritize shade-grown and sustainable cultivation methods,

Certification

- Common organic certifications include **APEDA (India)**, **USDA Organic** (United States), **EU Organic** (European Union), and **JAS Organic** (Japan).
- These certifications provide consumers with assurance that the coffee has met specific organic criteria.
- The certification process involves inspections of farms, production facilities, and records to ensure compliance with organic standards.

When choosing a brand, factors such as taste preferences, the origin of the coffee beans, the brand's commitment to sustainability, and certifications need to be considered.

Few brands in India
