

OTHER FROZEN SEAFOOD PRODUCTS

"Other frozen seafood" typically refers to a variety of frozen seafood products that are not classified as fish, shellfish, or crustaceans. This may include frozen products made from cephalopods such as squid, octopus, and cuttlefish, as well as other types of frozen seafood such as seaweed, sea urchins, and jellyfish.

Commercial Production

1. Harvesting or catching the seafood:

Done by fishing boats, aquaculture farms, or seaweed farms.

2. Processing the seafood:

Harvested or caught, it is typically brought to a processing plant where it is cleaned, shucked, and packaged.

3. Freezing the seafood:

Frozen using a variety of methods, such as blast freezing, plate freezing, or IQF (individually quick frozen) freezing.

4. Packaging and storage:

Packaged and stored at the appropriate temperature to maintain quality and freshness.
